About PHINERA ENGINEERING

Phinera Engineering & Consulting Ltd is a professional engineering and consulting firm based in Tanzania, specializing in mining engineering, industrial solutions, project management, and technical advisory services. We are committed to delivering innovative, efficient, and sustainable solutions tailored to client needs.

Our team consists of experienced engineers, consultants, and industry experts who combine technical knowledge, field experience, and modern technology to execute projects with precision, safety, and excellence

www.phineratanzania.co.tz

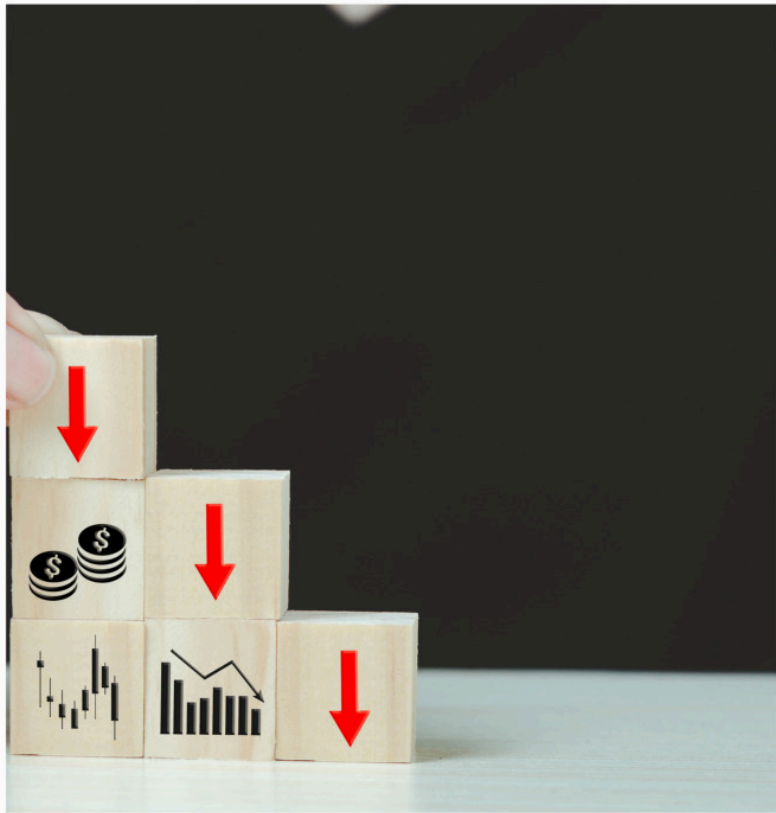

VISION

To be a leading engineering and consulting firm in Africa, delivering world-class solutions with integrity and excellence.

www.phineratanzania.co.tz

MISION

To provide innovative and reliable engineering & consulting services that drive sustainable industrial and mining development.

www.phineratanzania.co.tz

Our Goals

Deliver High-Quality Engineering Solutions

We aim to provide precise, reliable, and innovative engineering and consulting services that meet international standards and ensure successful project outcomes.

Promote Sustainable Industrial Development

We focus on delivering solutions that support responsible mining and industrial growth while minimizing environmental impact and maximizing long-term value.

Build Strong Client Partnerships

We strive to develop long-term relationships with clients through trust, transparency, and consistent delivery of measurable results and professional excellence.

BUSINESS PLAN

Phinera Engineering & Consulting Ltd provides innovative engineering and consulting services in mining and industrial sectors, delivering sustainable, efficient and high-quality solutions while building strong and trusted client relationships.

Project Portfolio

Selected mineral processing and plant construction assignments across Tanzania.

x x

Office Location

x x

Mpanda-Katavi, Tanzania

x x

Project Coverage

Chunya, Mpanda, Dodoma, Geita and Kahama.

Project Register

01

Chunya Mineral Processing Plant Construction

Capacity: 150 TPD Status: Construction Stage

02

Mpanda Froth Flotation Plant Construction

Capacity: 150 TPD Status: 80% Complete

03

Dodoma Copper Leaching & Cementation Plant

Capacity: 150 TPD Status: Ongoing

04

Geita Gold CIP Plant Construction

Capacity: 150 TPD Status: Ongoing

05

Kahama Gold CIP Plant Construction

Capacity: 150 TPD Status: Ongoing

PROJECT 01

Chunya Mineral Processing Plant Construction

Location

Chunya, Tanzania

Project Type

Mineral Processing Plant Construction

Capacity

150 TPD

Status

Construction Stage

Project Summary

Construction of a 150 TPD mineral processing plant involving process equipment installation, tank works, access structures and general plant development activities.

PROJECT 01 / CHUNYA

× ×

× ×

× Project Summary

- The Chunya project features plant equipment
- × installation, tank fabrication interfaces and site construction works associated with mineral processing plant development.

PROJECT 02

Mpanda Froth Flotation Plant Construction

Location

Mpanda, Tanzania

Project Type

Froth Flotation Plant Construction

Capacity

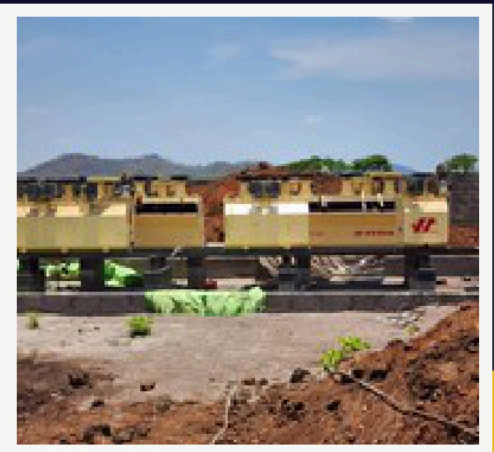

150 TPD

Status

80% Complete

Project Summary

Development of a 150 TPD froth flotation plant including crushing, milling, flotation-related equipment installation and supporting civil foundations.

PROJECT 02 / MPANDA

× ×

× ×

× Project Summary

× The Mpanda plant incorporates crushing and
× conveying systems, ore preparation equipment
and structural steelworks supporting the
flotation process line.

PROJECT 03

Dodoma Copper Leaching & Cementation Plant

Location

Dodoma, Tanzania

Project Type

Capacity

150 TPD

Status

Ongoing

Project Summary

Ongoing construction of a 150 TPD copper leaching and cementation plant with process cells, containment works and related installation activities.

PROJECT 03 / DODOMA

× ×

× ×

× Project Summary

× The Dodoma project includes leaching and cementation infrastructure, process cell installation and plant area development for ongoing copper processing operations.

PROJECT 04

Geita Gold CIP Plant Construction

Location

Geita, Tanzania

Project Type

Gold CIP Plant Construction

Capacity

150 TPD

Status

Ongoing

Project Summary

Ongoing construction of a 150 TPD gold CIP plant involving CIP tank installation, structural steel erection, civil works and supporting process infrastructure.

PROJECT 04 / GEITA

× ×

× ×

× Project Summary

- × The Geita gold CIP project highlights tank
- × erection, mechanical installation and civil
- × foundation works undertaken for the
- × development of the processing plant.

PROJECT 05

Kahama Gold CIP Plant Construction

Location

Kahama, Tanzania

Project Type

Gold CIP Plant Construction

Capacity

150 TPD

Status

Ongoing

Project Summary

Ongoing construction of a 150 TPD gold CIP plant including reinforced concrete works, structural formwork, equipment installation and related plant infrastructure.

PROJECT 05 / KAHAMA

Plant construction works supporting the development of a 150 TPD gold CIP facility.

× ×

Project Summary

× ×

The Kahama project combines civil construction, formwork installation and process equipment development for an ongoing 150 TPD gold CIP plant.
